

The SZQ electric actuated temperature regulating valve, supplied with actuator only for TRV conversion (may be suitable for fitting on existing valves) or supplied with straight or angled valve. The actuator can therefore be activated by a programmable thermostat sited to give comfort heating with no manual input. The programmable thermostat will also have the ability to set the time period you wish the heat to come on and maintain it at an economical temperature, therefore saving on energy costs.

Features:

- Wax propellant
- Spring Return design: valve close when power is off
- Threaded connection, easy and simply installation and demount
- Lower noise when running
- High anti-jamming

Valve Materials:

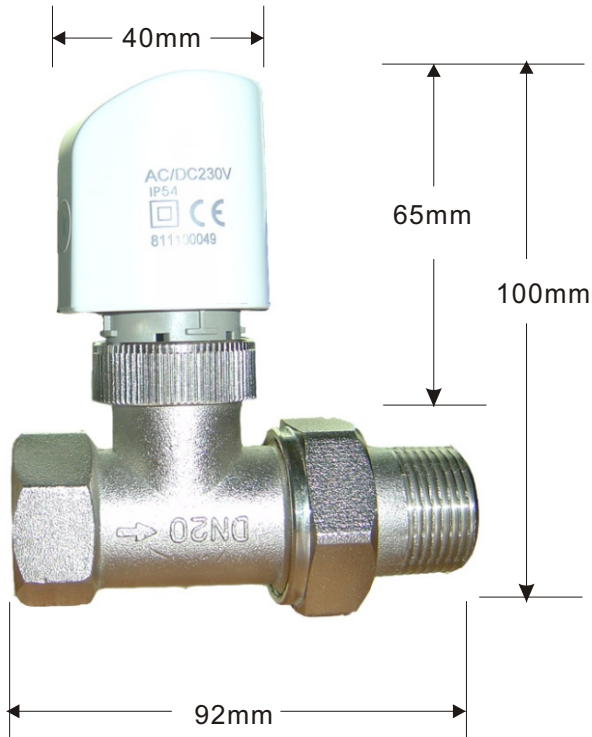

Size: 1/2", 3/4"
 Valve body: brass
 Valve core: brass
 Interior material: brass

Actuator Specifications:

Type	SZQ electric actuator
Electric parameter	230VAC(24VDC, 110VAC)
Power consumption	1.8W
Protection Grade	Ip54
Force	110N
Stoke	3mm
Running time	3-5min
Ambient temperature	-10°C-45°C
Actuator material	Anti-flammable PC
Connection	M30*1.5mm thread
